

EURIECA™ MOS SESSIONS v12.1 (2025)

MOS for EURIECA™ Practitioners v12.1 has been designed to be easier to access and more dynamic, taking into account the operational environment. We have recognised the difficulties in completing MOS sessions every month, so the new approach includes more flexibility.

We have updated the Online Sessions for 6 months of the year (April to September) and have consolidated the Practical-Based Sessions into two 3-month blocks during Q1 (January to March) and Q4 (October to December). The exact timing of this training will be determined by your local EURIECA™ MOS Facilitators.

Below is the 2025 EURIECA™ MOS Schedule, with the Practical-Based Sessions being on Page 2.

EURIECA™ MOS SCHEDULE

Month	Session
January	Q1 Practical Sessions
February	
March	
April	Understanding Kinematics/Injury Patterns
	+ RQI or CPR Manikin practice
May	DCAPP & Chest Injuries
	+ RQI or CPR Manikin practice
June	Head Injuries-Managing the bleeding scalp.
	+ RQI or CPR Manikin practice
July	Confused & Agitated
	+ RQI or CPR Manikin practice
August	Mental Health Awareness
	+ RQI or CPR Manikin practice
September	Managing Pain- Stepwise approach
	+ RQI or CPR Manikin practice
October	Q4 Practical Sessions
November	
December	

PRACTICAL SESSIONS

Below is a table of minimum requirements for each Quarter of Practical Sessions, which cover the risk-critical Skill Stations from the EURIECA™ programme, along with Scenarios which reinforce the lessons learned from the Skill Stations.

Lesson and Scenario Plans are available to download from the Gibb Group LMS, under the Group Leader Menu > Download Area > EURIECA™ MOS

Q1 Practical Sessions

Skill Station	Scenario
Airway and Breathing (Lesson Plan 4)	1 & 4
Catastrophic Bleed (Lesson Plan 3)	2 & 3
Resuscitation and Choking (Lesson Plan 22)	11 & 7

Q4 Practical Sessions

Skill Station	Scenario
Catastrophic Bleed (Lesson Plan 3)	8 & 9
Resuscitation and Choking (Lesson Plan 22)	11 & 10
Circulation, Medical Card game (Lesson Plans 6 & 11)	5 & 6

CONSIDERATIONS

Completion of Scenarios

If the working environment / training rig is available, an aim for all EURIECA™ teams should be to complete scenarios in that environment. If the relevant EURIECA™ component is included within Rescue Exercises, this then qualifies as that quarter's EURIECA™ MOS for the practitioners involved, as long as adequate records are made and retained.

Other types of Sessions

We understand that teams around the UK may undertake other session types as part of ongoing MOS, and may be able to consider these sessions as qualifying as that quarter's EURIECA™ MOS.

Examples of such sessions may be :-

- Short duration, more regular, partial Skill Stations at pre-sail safety briefs
- Use of Kahoot Interactive Quizzes – We have a number of these pre-made, please contact if interested
- Table-Top exercises with Rescue and EURIECA™ combined
- Sessions on Safety Days

Please [contact your Clinical Lead](#) should you wish to discuss this further.
